70 x 45 Fly Rafter Above 15° Pitch.

90 x 45 Fly Rafter Below 15° Pitch.

Important Set Out Notes:

- Soffit bearer fixed to right hand side of the rafter, looking at the building.
- To ensure birds cannot enter the roof space leave the bottom purlin off until fascia has been installed.
- Based on minimum purlin thickness of 45mm.
- A 10mm soffit clearance has been allowed for.
- Multifit Panel Fascia System is suitable for use with sloping soffits up to 35°.
- Soffit bearers are required on all hip corners.

Important Product Notes:

- Store product securely on site away from incompatible materials and protect from wind and operating machinery.
- Product surface protected with plastic film should be stored under cover, away from u/v light, and film removed immediately after installation.
- It is a requirement of the products warrantee to obtain and thoroughly read a copy of Roofing Industries handling, storage and installation guide. Available from the supplying branch or alternatively from www.roof.co.nz
